International Youth Camp against Imperialism & Fascism

Denmark

July 28th to August 6th
2006

- International solidarity is action and resistance against war and injustice.

By taking part in the 20th international youth camp against imperialism and fascism you can contribute in

- developing international solidarity
- transcending borders for cooperation
- meeting other progressive people
- a new step on the road of making the dream of a better future come trough
- this and much more together with young people from other countries and continents

At the camp you will meet young people informing about the real situations in their countries, discussing and exchanging experiences

The joint actions of millions of people opposing the war against Iraq and against imperialist globalisation has shown that it is possible to join the whole world together and create our own future.

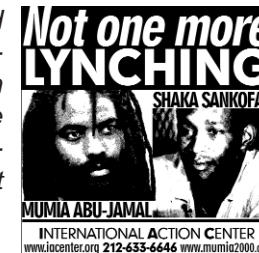

The First Victim is Truth

The rulers - be it George Bush, Tony Blair or the Danish prime minister Fogh Rasmussen - show a total lack of respect for human lives. But the youth of the world cannot allow their wealth and power, their wars and terror to lead us directly into the abyss.

There are many ways to resist. The International Youth Camp Against Imperialism & Fascism is a great opportunity to establish unity through diversity.

The political activist and journalist Mumia Abu-Jamal, now 51, has been held on death row in the US for 23 years for a murder, he did not commit
